

# FILM

## PROCESSING

### DEVELOP SCAN PRINT

Fotofast has been processing film for over twenty five years. (scans since 98') No matter what brand of film you have our experienced team members will develop, scan and print it to perfection to produce photos you'll treasure forever. Photo prints are available in gloss or matte/lustre surfaces. Gloss is ideal for extra depth and contrast. Matte is recommended when the print is to be framed for display and often used for weddings and portraits. Fotofast operates Agfa film processors and digital scanner chemical print labs with real Kodak Professional photo paper. Weekly chemistry quality control monitoring ensures you'll always get the best results.

# 35MM

#### Limit of Liability

We will always handle your rolls with the utmost care. Submitting your film for processing constitutes an agreement that any loss, damage or unforeseen events by Fotofast and associated out-labs will only entitle you to replacement with an equivalent quantity/size of unexposed photographic film. Except for such replacement, our acceptance of film is without other liability, and recovery for any incidental or consequential damages is excluded. We recommend choosing Satchel Post to safely ship your film and negatives.
