

WIDE FORMAT PRINTING

Retail displays, event's, exhibitions, window dressing...

ready from **1-2 week days***

Express service available, surcharges may apply.

Vibrant, high-quality wide format prints that are scratch, smudge and water resistant without lamination. Fotofast uses HP Latex inks which are odour free and so perfect for interior environments where odour might be of concern including retail, office, medical, restaurants, bars, homes etc.

Fotofast has over twenty years experience in photographic retail imaging so colour and substrate quality is important to us. In-house media calibration ensures you'll get great results every time.

File Setup Guidelines

Jpeg files?

The larger the print size the more pixel resolution you need to print clearly. However as roughly twice the diagonal measurement of a print is the optimum minimum viewing distance from it often pixelation will not be visible unless viewed up close.
Supply the original file or if it has been edited, ensure it hasn't been scaled down.

Using Image editing software such as Adobe® Photoshop®?

Print sizes larger than ¼ m² in area can be set up at half size or at a lower resolution than 300dpi.
Convert any Spot colours to Process. Save as a standard jpeg at maximum quality (large file).

Working in Page Layout Software such as Adobe® Illustrator®, Indesign® or Quark®?

Print sizes larger than ¼ m² can be set up at half size. Output as a press ready flattened PDF with all fonts outlined, no trim or bleed included.
Convert all Spot Colours to Process. To avoid print faults don't mix RGB & CMYK in the one document. Don't use overprint.
For rich CMYK blacks use mix 25:25:25:100.
